- The third quarter 2018 income tax rate of 22.5 percent decreased 10 percentage points year-over-year, reflecting the reduced federal statutory rate and results of tax planning and management, partially offset by the return of the nondeductible health insurance tax for 2018.

UNITEDHEALTH GROUP Reconciliation of Non-GAAP Financial Measures

- Adjusted Net Earnings per Share
- Adjusted Cash Flows from Operations

Use of Non-GAAP Financial Measures

Adjusted net earnings per share and adjusted cash flows from operations are non-GAAP financial measures. Non-GAAP financial measures should be considered in addition to, but not as a substitute for, or superior to, financial measures prepared in accordance with GAAP.

Adjusted net earnings per share excludes from GAAP net earnings per share, intangible amortization and other items, if any, that do not reflect the Company's underlying business performance. Management believes the use of adjusted net earnings per share provides investors and management useful information about the earnings impact of acquisition-related intangible asset amortization. Management believes the exclusion of these items provides a more useful comparison of the Company's underlying business performance from period to period.

Management believes the use of adjusted cash flows from operations provides investors and management with useful information to compare our cash flows from operations for the current period to other periods, when the Company does not receive its monthly payment from the Centers for Medicare and Medicaid Services (CMS) in the applicable quarter. CMS generally remits their monthly payments on the first calendar day of the applicable month. However, if the first calendar day of the month falls on a weekend or a holiday, CMS has typically paid the Company on the last business day of the preceding calendar month. Adjusted cash flows from operating activities presents operating cash flows assuming all CMS payments were received on the first calendar day of the applicable month.
